REMARKS

Applicants' undersigned attorney wishes to thank the Examiner for his courtesy extended in a telephone conference on April 23, 1985, at which time the Examiner conveyed the substance of an Advisory Action which was being prepared for mailing at that time. That Advisory Action, mailed the next day, indicates that, upon the filing of an appeal, the proposed amendment (after final action) would be entered, and that claims 15-18 would be allowable, but that claims 10-14 would not be allowable.

Having filed a notice of appeal on April 23, 1985, claims 11 and 12 are cancelled, and claims 10, 13 and 14 stand rejected under 35 U.S.C. §103 over German Patent No. 2,609,365 of Csapo, which shows a cardiac catheter with an internal thermistor. Claims 15-18 are allowable.

During the aforementioned telephone conference, the Examiner also indicated that an affidavit or declaration establishing the significance of the differences between the claimed catheter and the catheter shown by Csapo may overcome the rejection of claim 10 and the claims depending therefrom. Accordingly, a Rule 132 Declaration by Dr. Neal E. Fearnott is being filed herewith which is believed to overcome the rejection of claims 10, 13 and 14. Reconsideration of the application in light of this declaration is respectfully requested.
